Personal Profile

I'm a media professional with a strong background in Design, photography, videography, motion design . After graduating from Sheffield Hallam University in 2021 with a BA in Media Production and a Master's in Media Management, I've worked in both in-house and agency roles, applying and refining these skills across a range of projects. Alongside full-time employment, I've also pursued freelance work—initially as a creative outlet, but over time developing it into a thriving business. My experience reflects a balance of technical expertise, creative flair, and a passion for visual storytelling. I am equally happy working behind a camera or an editing desk. I am an active individual who likes to experiment and innovate to keep up to date with digital practices and consider myself a strong self learner in order to help deliver content I can be proud of.

Current Employment

Chapter II | 2024–present

Over the past 2 years, I've worked at a creative agency, providing video and photography services across a variety of projects. This role has not only allowed me to flex my creative skills but also sharpen my abilities in project management. I oversee every stage of production—from client briefings and storyboarding to hands-on filming, editing, and post-production. In a relatively short time, I've worked with multiple brands across different sectors, which has exposed me to a wide range of scenarios and challenges. As a result, I'm well-versed in thinking quickly on my feet and adapting under pressure.

Beyond video and photography, I've led several design projects, including motion graphics and web development. Managing multiple clients and projects simultaneously is part of my day-to-day, so multitasking and prioritising effectively have become second nature.

Education

84% - Distinction

Sheffield Hallam University 2017 - 2021 - Digital Media Management MA

My masters degree allow me to apply my prior media studies into real client briefs. This matured my skillset to incorporate established design methodologies, manage E2E media production workflows and apply current best practice to deliver real commercial campaigns and design concepts to meet the needs of target audiences.

77% - 1st Class Honours

Sheffield Hallam University 2017 - 2021 - Digital Media Production BA

My first degree allowed ne to tap into every media creative subject, not just design. It was here I would go on to learn animation, video, photography, website design, Sound design and much more.

Work Experience

Multimedia Designer Mattress Online | 2022-24

My time at Mattress Online initially saw me take on the task of a company rebrand along with a push for more video content and motion design. By the end of my first year I had not only refined the skills I was brought in for but had cemented workflows that made me more efficient at my role, therefore, providing more capacity to explore other areas that would add value to the business. e.g. using blender to create scaled 3D visuals of brick and mortar stores to present interior design concepts to potential outfitters

Media Director Camp Becket Massachusetts | Summer 2019

Before my final year of studies I flew over to the US to take on the role as Media Director at Camp Becket summer camp for boys. Here my role was to organise the media team throughout the weeks and run our social channels with planned social content. I also acted a support role for both the photographer an videographer whilst also holding creative classes for the kids twice a week.
